## Paper, Paper, Paper

The school is calculating how much paper to order for the new copy machine. They want to order enough for four weeks of school. Ms. Jones figured out how much paper was used each day by the teachers. This is what she discovered:

Monday	150 sheets
Tuesday	300 sheets
Wednesday	450 sheets
Thursday	300 sheets
Friday	150 sheets

Using this data, can you decide how much paper the School should order for the month?

**Extra Challenge:** Paper costs \$12/ream, which is 500 sheets. How much money will the school need to spend on paper for the month?

**Extra Challenge:** The machine also uses a new toner (ink) cartridge every 1500 sheets, How many toner cartridges will it need in the month?
