

Name: _____

Brownies and Cookies and Fractions of Things...

8 friends fairly shared brownies at a party. Each friend got 1 whole brownie, one-half brownie, and one-quarter brownie. How many brownies did the friends start with?

Challenge:

Your mother baked cookies for you and three friends (there were four of you together). After she gave out all the cookies fairly, each of you had 2 whole cookies and $\frac{3}{4}$ of a cookie. How many cookies did your mother bake?
