

Name: _____

Lesson: A Train of Blocks

Grade level: 2-3

Skills: number sense, measurement, addition

Challenge:

How many inches long would a “train” of five 1- inch blocks be if they were lined up with 1” between each block? Show your work!

Challenge 2:

How long would a train of 10 blocks be?

Super Challenge:

Can you figure out a pattern to find the number of inches this train would be for any number of blocks?

Super Extra Challenge:

If you have 20 blocks and line up two blocks then leave an inch, and so on until you use all of your blocks, how long would your train be?
